- Notice of Offer
- SPP Booklet

ENDS

For more information visit www.truscreen.com or contact Martin Dillon, TruScreen Chief Executive Officer, email: martindillon@truscreen.com.

About TruScreen:

TruScreen's real time cervical cancer technology utilises a digital wand which is placed on the surface of the cervix to measure electrical and optical signals from the surrounding tissue. A sophisticated proprietary algorithm framework distinguishes between normal and abnormal (cancerous and precancerous) tissue to identify precancerous change, or cervical intraepithelial neoplasia (CIN). A Single Use Sensor (SUS) is used for each patient to protect against cross-infection.
